

Christos-Grigorios Gkovaris

MEng CSE Candidate | Software Engineering | Backend & Systems | Robotics

 christosgkovariscs52@gmail.com  +30 694 6238 391  LinkedIn  GitHub  Portfolio

 EU Citizen | Open to relocation to Switzerland

SUMMARY

Final-year MEng Computer Science and Engineering candidate with hands-on experience in **backend development, full-stack development, systems software, robotics, and REST API development**. Experienced with **Python, Java, C/C++, JavaScript, Flask, Spring Boot, PostgreSQL, Docker, Git, and CI/CD**, with project experience in **observability, decision-support systems, automation, and robotics**. Seeking **software engineering opportunities in Switzerland** focused on backend, platform, or full-stack development.

EDUCATION

MEng in Computer Science and Engineering (Integrated Master's | 5-years), *University of Ioannina* 

EQF Level 7 | 300 ECTS

10/2021 – 09/2026

Ioannina, Epirus, Greece

THESIS: Chrome Extension for Intent-Based Search Ranking and User Decision Support (In Progress). Developing a decision-support Chrome Extension that extracts, ranks, and organizes products using **weighted scoring, purchase-plan generation**, and configurable user preferences.

CORE SKILLS

PROGRAMMING LANGUAGES

Python, Java, C, C++, JavaScript, SQL

BACKEND & DATABASES

Flask, Spring Boot, REST APIs, JPA/Hibernate, PostgreSQL, MySQL, Backend Development

TOOLS & TESTING

Git, GitHub, Linux, Postman, JUnit, Mockito, CI/CD, GitHub Actions

ALGORITHMS & ML

A* Search, Minimax, Neural Networks (MLP), K-Means Clustering, Recommender Systems

LANGUAGES

Greek — Native | English — ESB C2 | French — DELF A2

PROJECTS

EventHorizon Observability Platform — Python, Flask, REST APIs, Git 

08/2026 – Present

- Developing a Python/Flask **observability platform** with **REST APIs** for application log querying and filtering.
- Built **Flask Blueprint REST endpoints** for health checks, log retrieval, validation, and severity filtering.
- Designed a **modular backend architecture** across APIs, services, infrastructure, testing, and documentation.
- Implemented **CI/CD with GitHub Actions** for automated linting, testing, and Docker builds.

Chrome Extension for Intent-Based Search Ranking and User Decision Support – JavaScript, HTML, CSS

02/2026 – Present

- Developing a **JavaScript Chrome Extension (Manifest V3)** for product extraction and decision support.
- Implemented **DOM-based product extraction**, price parsing, category detection, and **ranking algorithms**.
- Built **budget-constrained purchase-plan optimization** and an interactive UI for product prioritization.

Traineeship Management Platform – Java, Spring Boot, MySQL 

02/2025 – 06/2025

- Developed a **Java/Spring Boot multi-role web application** for traineeship workflow management.
- Implemented **Jaccard-based matching** to align student preferences with available opportunities.
- Built a **JPA/Hibernate persistence layer** with relational database integration and **CRUD operations**.

Jackal and RRbot Simulations – Python, ROS, Gazebo, RViz 

02/2023 – 06/2023

- Developed robotic simulation and **navigation workflows** using **ROS, Gazebo, ArUco**, and **RViz**.
- Implemented **trajectory generation** using cubic polynomials and parabolic blends.
- Engineered **real-time robot control nodes** for **autonomous navigation** and coordinated motion.

Neural Classification and Unsupervised Learning – Java 

10/2025 – 01/2026

- Implemented a **3-layer MLP** with **backpropagation** and **gradient descent** in Java.
- Developed a **K-Means clustering algorithm** for **unsupervised learning** on structured datasets.
- Tuned **hyperparameters** to improve convergence and classification performance.

EXPERIENCE

Laboratory Assistant at Electronics, University of Ioannina (VCAS Lab) 

02/2025 – 06/2026

Ioannina, Epirus, Greece

- Mentored **50+ students** in debugging and troubleshooting circuit implementations.
- Provided **guidance on schematic design** and **PCB layout** using OrCAD.
- **Supported lab sessions** by preparing setups, assisting with measurement tools, and troubleshooting issues.

ADDITIONAL EXPERIENCE

Python Programming Instructor - Secondary Education Tutoring Center GNOSI

07/2024 – 08/2024

Chalkida, Evvoia, Greece

- Delivered **Python** programming lessons to 15–20 students through hands-on exercises.
- Guided students through the development of **5+ Python applications**, strengthening problem-solving skills.

IT Support Specialist - Secondary Education Tutoring Center GNOSI

07/2023 – 08/2023

Chalkida, Evvoia, Greece

- Provided **technical support** and troubleshooting, resolving hardware and software issues across systems.
- Maintained **system reliability** by diagnosing faults and minimizing operational disruptions.
