

Christos-Grigorios Gkovaris

MEng CSE Candidate | Software Engineering | Backend & Systems | Robotics

 christosgkovariscs52@gmail.com  +30 694 6238 391  LinkedIn  GitHub  Portfolio

 EU Citizen | Open to relocation to Switzerland

SUMMARY

Final-year MEng Computer Science and Engineering candidate with hands-on experience in backend development, systems software, and robotics, working with Python, Java, C/C++, JavaScript, and Flask. Currently developing EventHorizon, a Flask-based observability platform for service monitoring and log analysis. Seeking software engineering opportunities in Switzerland focused on backend systems, automation, and robotics.

EDUCATION

MEng in Computer Science and Engineering (Integrated Master's | 5-years), *University of Ioannina* 

10/2021 – 09/2026

EQF Level 7 | 300 ECTS

Ioannina, Epirus, Greece

Thesis: Chrome Extension for Intent-Based Search Ranking and User Decision Support (In Progress). Developing a decision-support Chrome Extension that extracts, ranks, and organizes products using weighted scoring, purchase-plan generation, and configurable user preferences.

CORE SKILLS

PROGRAMMING LANGUAGES

Python, Java, C, C++, JavaScript, SQL

BACKEND & DATABASES

Flask, Spring Boot, REST APIs, JPA/Hibernate, PostgreSQL, MySQL

SYSTEMS & ROBOTICS

Linux, Multithreading, Synchronization, ROS, Gazebo, RViz

TOOLS & TESTING

Git, GitHub, Postman, JUnit, Mockito

ALGORITHMS & ML

A* Search, Minimax, Neural Networks (MLP), K-Means, Recommender Systems

LANGUAGES

Greek — Native | English — ESB C2 | French — DELF A2

PROJECTS

EventHorizon Observability Platform — Python, Flask, REST APIs, Git

08/2026 – Present

- Developing a **Flask-based observability platform** for querying, filtering, and analyzing application logs.
- Built **modular REST endpoints** with Flask Blueprints for health checks, log retrieval, and severity filtering.
- Designed a **modular project architecture** separating backend, frontend, infrastructure, tests, docs, and logging.

Chrome Extension for Intent-Based Search Ranking and User Decision Support – JavaScript, HTML, CSS

02/2026 – Present

- Developing a **Chrome Extension** that imports and analyzes products for purchase decision support.
- Implemented **product extraction**, **price parsing**, **category detection**, and **weighted scoring algorithms**.
- Built **purchase-plan generation** and an interactive user interface for product comparison.

Traineeship Management Platform – Java, Spring Boot, MySQL

02/2025 – 06/2025

- Developed a **multi-role web platform** for managing traineeship workflows and user interactions.
- Implemented **Jaccard-based matching** to align student preferences with available opportunities.
- Built a **JPA/Hibernate persistence layer** for reliable database operations and application state.

Jackal and RRbot Simulations – Python, ROS, Gazebo, RViz

02/2023 – 06/2023

- Developed **motion planning** and **navigation** for simulated robotic systems using **ROS**, **Gazebo**, and **RViz**.
- Implemented **trajectory generation** using **cubic polynomials** and **parabolic blends**.
- Engineered **real-time control nodes** for **autonomous navigation** and **coordinated motion**.

Neural Classification and Unsupervised Learning – Java

10/2025 – 01/2026

- Implemented a **3-layer MLP** using **backpropagation** and **gradient descent**.
- Developed a **K-Means clustering algorithm** for **pattern discovery** in structured datasets.
- Tuned **learning-rate** and **network parameters** to **improve convergence performance**.

EXPERIENCE

Laboratory Assistant at Electronics, *University of Ioannina*

02/2025 – 06/2026

- Mentored **50+ students** in debugging and troubleshooting circuit implementations.
- Provided **guidance on schematic design** and **PCB layout** using OrCAD.
- **Supported lab sessions** by preparing setups, assisting with measurement tools, and troubleshooting issues.

ADDITIONAL EXPERIENCE

Python Programming Instructor - Secondary Education Tutoring Center GNOSI

07/2024 – 08/2024

- Delivered **Python** programming lessons to 15–20 students through hands-on exercises.
- Guided students through the development of **5+ Python applications**, strengthening problem-solving skills.

IT Support Specialist - Secondary Education Tutoring Center GNOSI

07/2023 – 08/2023

- Provided **technical support** and troubleshooting, resolving hardware and software issues across systems.
- Maintained **system reliability** by diagnosing faults and minimizing operational disruptions.
